# Virtual Events Platform

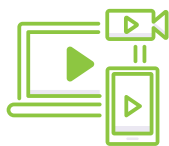

A virtual event platform takes standard webinars and video calls to the next level, it becomes the core of your online event bringing together all of your content in one easy to use site. The platform is where all of your delegates will access the event and content as well as interacting with other delegates.

Below are just some of the great features that help bring together and engage attendees, giving as close an experience to an “in-person” event as possible.

## Key Features

Fully Branded  
Event Website
