Impact of COVID-19 on Gatwick

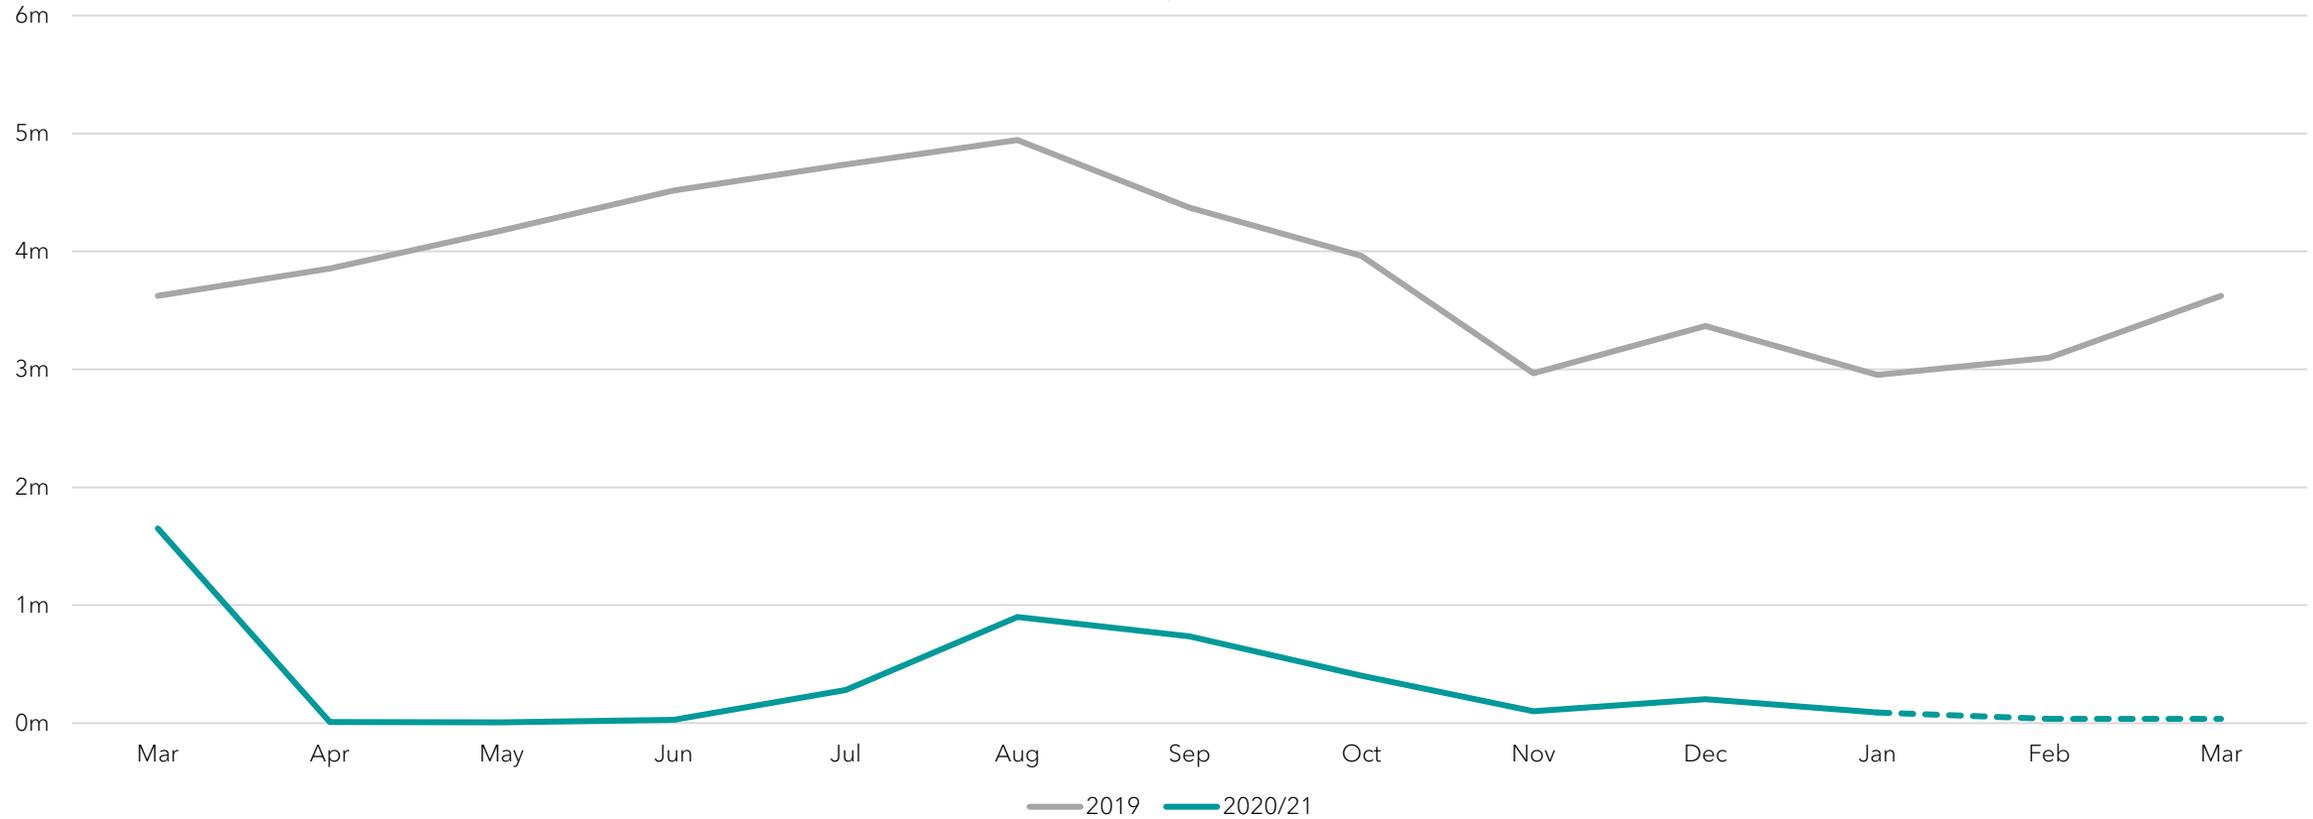

Gatwick – before COVID-19

A **vital piece of national infrastructure**, enhancing the **UK's global connectivity** and making a significant economic contribution by supporting **jobs, tourism and trade** throughout the UK.

Impact of COVID-19 at Gatwick

Monthly Passenger Volumes (m)

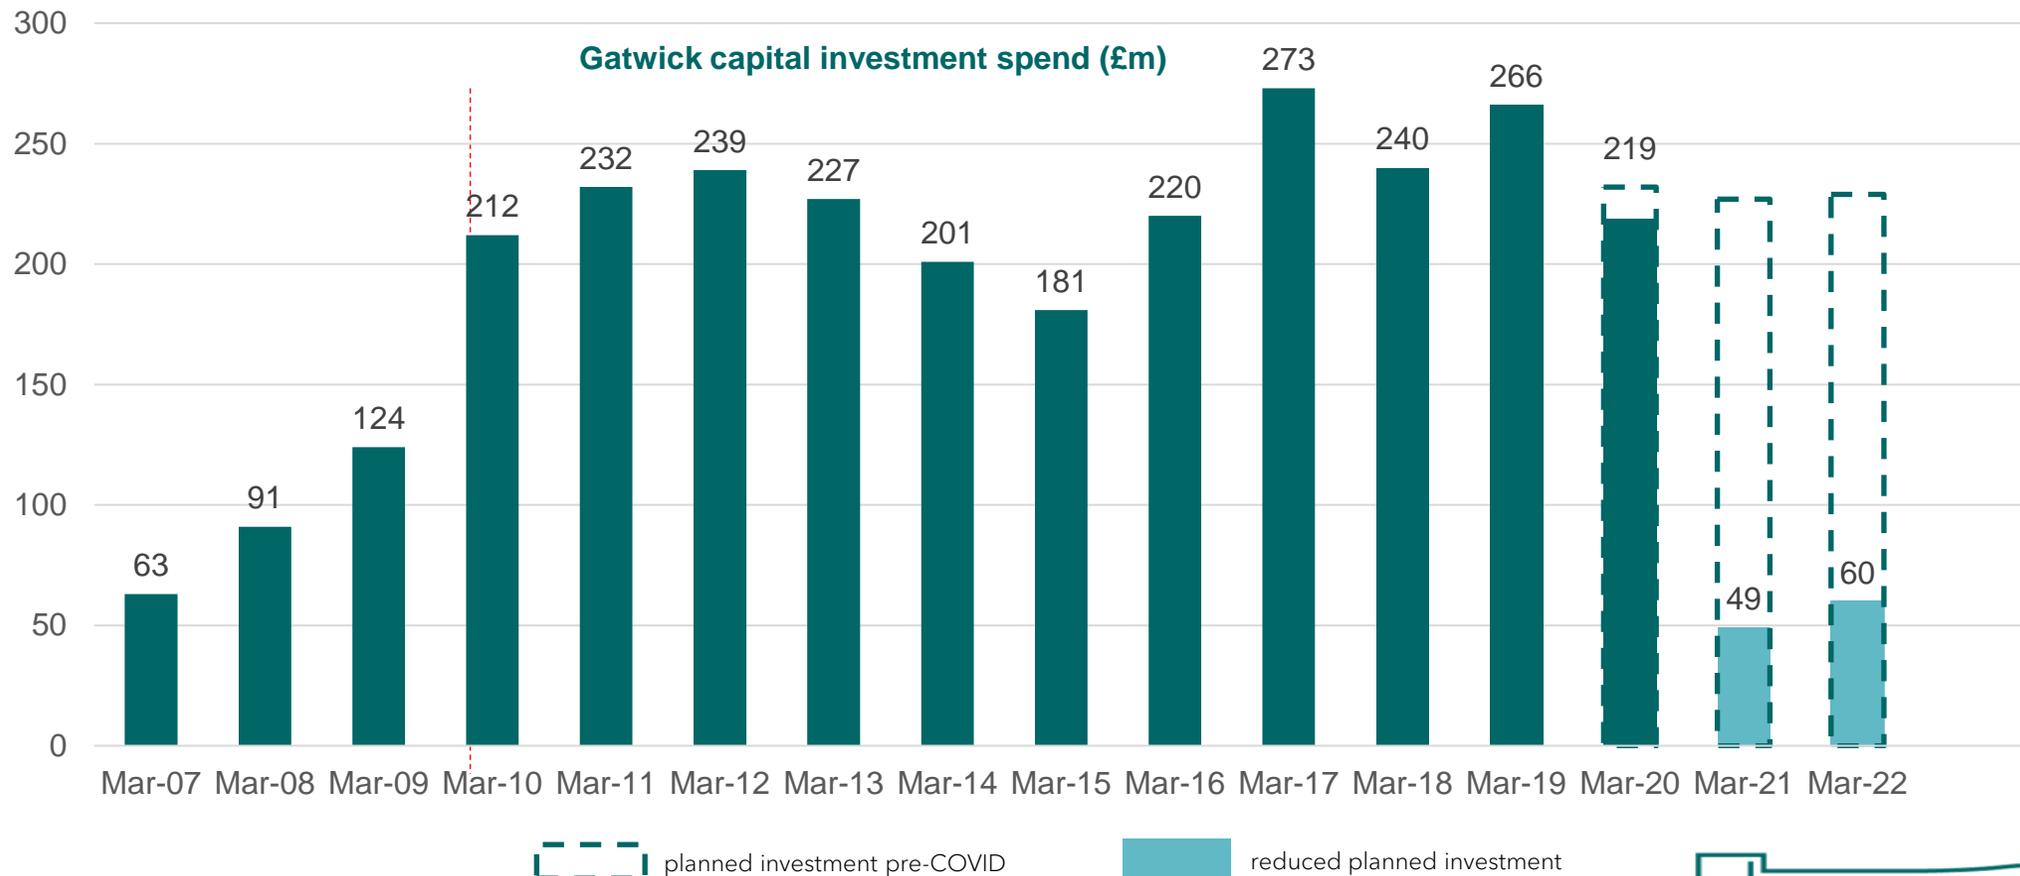

In 2020, Gatwick saw 10.1 million passengers compared to 46.6 million passengers in 2019, a **78.2% drop**.

Investing in growth and service

→ £2.5 billion invested since 2009

→ Planned investment until 2022 reduced by £347m from £456m to £109m

The impact on revenue and jobs

- Airport revenues have dropped substantially – the airport posted a 61.3% fall in revenue and a **£321m loss for the first six months of 2020**.
- By the end of October 2020, **40% of those employed by Gatwick Airport Limited had lost their jobs** (785 in the Spring and a further 598 in October, leaving 1,867).

Gatwick Airport records £321m loss due to pandemic

By Rose Lock | @roselock22
Reporter

A photograph of the Gatwick Airport terminal building and several aircraft on the tarmac. The aircraft include a British Airways plane and a Virgin Atlantic plane.

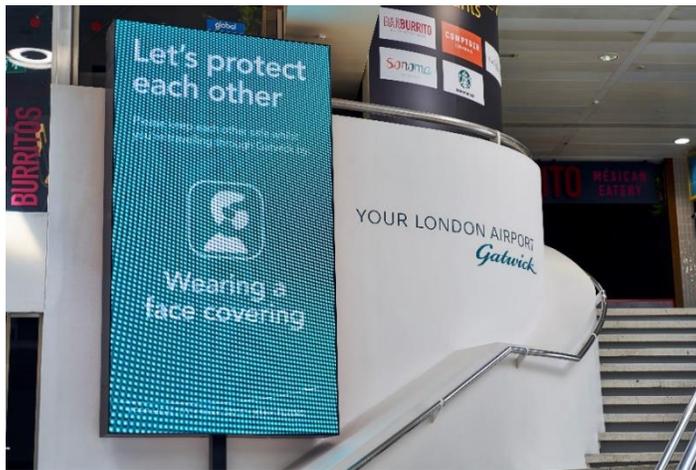

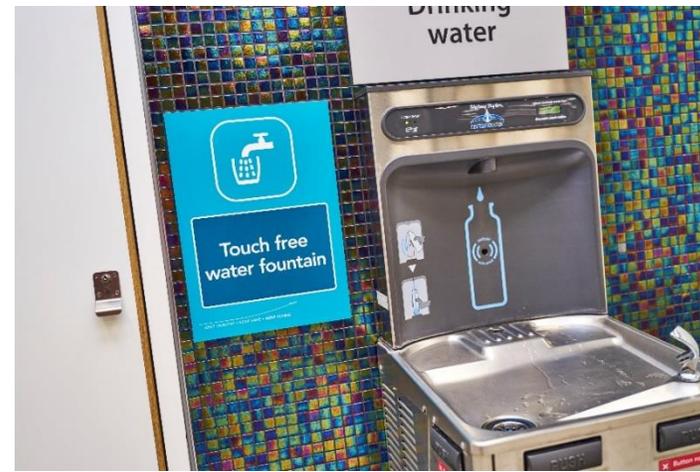

A smartphone displaying a news article, likely the one from The Argus, with a person's profile picture visible on the screen.

COVID-19 challenges and opportunities

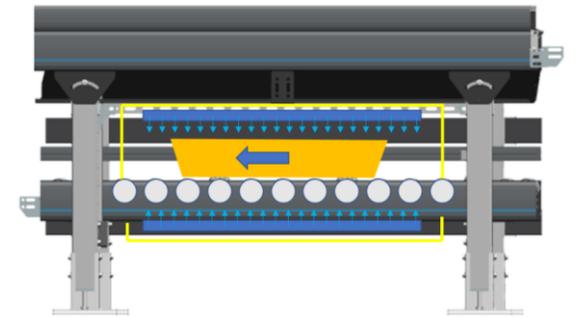

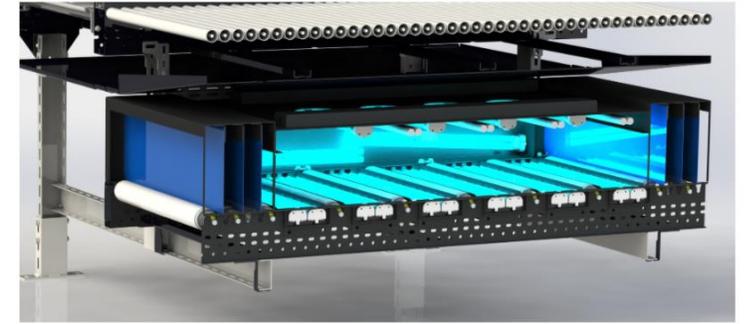

Creating a safe passenger journey

UV treatment of security trays

In September 2020, Gatwick was the first airport in the UK to treat its security trays with UV light energy.

- Laboratory tests demonstrate **99.9% disinfection rate** with every tray treated with short-wavelength UV-C light immediately before each passenger uses it.
- New system - provided by Smiths Detection - **highly effective against coronaviruses, including COVID-19 and SARS**, as the radiation warps the structure of their genetic material and prevents the viral particles from replicating.
- Each tray passes through a covered 'UV-tunnel' fixed underneath the hand luggage screening system, so that **every tray is treated immediately before each passenger uses it**.
- Gatwick and other airports also **deployed other anti-viral systems, such as coatings sprayed on to trays**, however this protection dissipates over time.

Gatwick's support for the national response

- In April 2020, Gatwick was the first airport in England to help establish a **COVID-19 testing centre**, located in one of our long-term car parks. Initially for NHS and health workers, its use was extended to include symptomatic people working in transport.
- Gatwick supported in facilitating **repatriation flights**, as well as **flights carrying medical supplies and PPE** from China and Turkey.
- Gatwick actively encouraged **staff on furlough to volunteer to help support their local communities** and local charities. Gatwick enabled operational vehicles to be used by staff to support home delivery services.

COVID-19 screening service at Gatwick

In November 2020, we announced the opening of a **pre-departure and post-arrival screening facility**, run by ExpressTest. The site, located within Gatwick's Long Stay Car Park at the South Terminal, **offers a fast and accurate lab-analysed PCR swab test**.

- The facility can be used by passengers who require a valid, negative COVID-19 test certificate for destinations requiring one from up to 96 hours before travel.
- Satisfies post-arrival requirements for the "Test to Release" scheme to ease travel restrictions and quarantine.
- ExpressTest is delivered using the latest gold standard PCR equipment.
- Lab-analysed test results emailed or texted to customers typically the next day. The cost for Gatwick's air passengers and on-airport staff is a subsidised rate of £60 and for the general public £99.

Proposed Gatwick vaccination centre

We continue to **offer the South Terminal as a vaccination centre** should it be required, and stand ready to support the vaccination programme.

- This proposed facility could provide 12,000 vaccinations per day.
- Gatwick has offered use of the car park and South Terminal facilities at no cost.
- The use of furloughed Gatwick staff to assist with the centre has also been offered.

Future of Gatwick and aviation post COVID-19

Our asks of Government

- **Providing liquidity:** Extended CCFF business loans
- **Protecting staff:** Extension of furlough, to remain in place for as long as travel corridors are closed
- **Securing business:** Further business rate relief
- **Sensible regulation:** Waiver of regulatory fees until air travel returns

Opportunities for future travel

The aviation industry needs Government to set out their **roadmap**, which makes clear how we can open up travel for Summer 2021 **with a clear route out of the travel and quarantine restrictions** as soon as it is safe to do so.

Effective, clear and consistent international travel rules in cooperation with other governments are key pre-requisites for international air travel to be able to recover.

Government considerations for future travel could include:

- **International recognised testing regime**
- **Vaccine passports**
- **Vaccine travel corridors**

Gatwick remains in demand

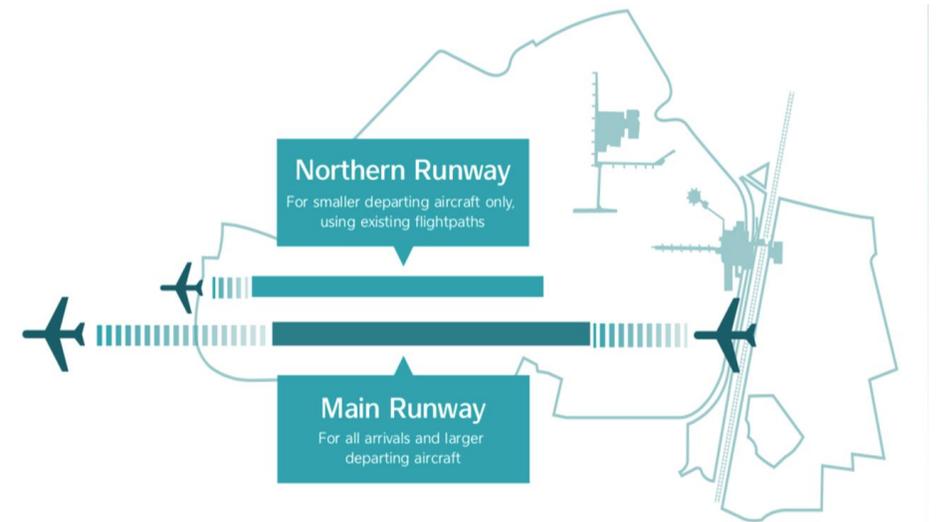

We are having encouraging conversations with a range of existing and potential new airlines about future growth prospects at the airport:

- **easyJet intend to ramp up capacity** as soon as restrictions ease, planning to deploy 71 aircraft to Gatwick and introducing new routes.
- **British Airways committed to operating** from Gatwick and in summer 2021 plans to offer 3 new long-haul destinations; in addition to the existing long-haul operation, a short-haul operation is also planned with a wide range of destinations on sale from May half-term.
- **Norwegian is focused on continuing to fly short-haul routes**, ceasing long haul across its network.
- **Wizz Air expanded its short-haul services** from Gatwick in 2020.
- **JetBlue have secured slots at Gatwick for Summer 2021**, with a daily JFK service and are working on a second US flight.
- New airlines also include **SunExpress** and **Corredon**.

The next decade – the Northern Runway

- We estimate that 2019 passenger levels will not be replicated until 2024, but that demand will return.
- Building on Gatwick's Master Plan, we will pursue development of the Northern Runway – currently used as a standby runway. This would be more routinely used for departures after the runway is widened to meet all safety standards.
- This scheme could be delivered by the late 2020s.
- All works would be **privately financed** and would be delivered whilst **minimising the impact** on existing airport operations.

Sustainability Issues?

61%

increase in the number of over 65s in the UK by 2032

Britain's over 65s already outnumber its under 16s

Our vision and aims

By achieving our aims, we want every patient to be able to say:

'I was treated with compassion'

'I was involved in a plan for my care which was understood and followed'

'I was treated in a safe way, without delay'

'And every member of our team to feel able to give their best and feel valued for doing so'

Our Strategic Objectives

Quality of care – creating a learning organisation and culture of continuous improvement to reduce repeated harms and improve patient experience

People – being a great place to work and to be a patient, where we listen, empower and value everyone

Modern healthcare – delivering the most effective and efficient treatment and care through standardisation in the delivery and outcome of clinical services

Digital – using digital technology and innovations to improve clinical pathways, safety and efficiency and empower patients

Collaborate – working with our partners in health and care to ensure the provision of a high quality sustainable NHS to the communities we serve

Our Vision

To provide an outstanding experience and best outcomes for patients and the team' and is supported by our values.

Our Mission

To ensure the provision of high quality, sustainable healthcare services to the communities we serve.

What makes the NHS an anchor institution?

NHS organisations are rooted in their communities. Through its size and scale, the NHS can positively contribute to local areas in many ways beyond providing health care.

The NHS can make a difference to local people by:

Purchasing more locally and for social benefit

In England alone, the NHS spends £27bn every year on goods and services.

Using buildings and spaces to support communities

The NHS occupies 8,253 sites across England on 6,500 hectares of land.

Working more closely with local partners

The NHS can learn from others, spread good ideas and model civic responsibility.

Reducing its environmental impact

The NHS is responsible for 40% of the public sector's carbon footprint.

Widening access to quality work

The NHS is the UK's biggest employer, with 1.6 million staff.

As an anchor institution, the NHS influences the health and wellbeing of communities simply by being there. But by choosing to invest in and work with others locally and responsibly, the NHS can have an even greater impact on the wider factors that make us healthy.

The term anchor institutions refers to large, typically non-profit, public sector organisations whose long-term sustainability is tied to the wellbeing of the populations they serve. Anchors get their name because they are unlikely to relocate, given their connection to the local population, and have a significant influence on the health and wellbeing of communities.

Purposeful partnerships – innovation

**WELLNORTH
ENTERPRISES**

Lord Andrew Mawson

Community Day “building relationships”

COVID-19 patients update

We are continuing to admit and treat patients with COVID-19.

Last week w/e
(and up to) 5/2
we averaged...

140 daily inpatients with confirmed COVID-19

Since the start of the COVID-19 pandemic **1,517** inpatients have received treatment and have been discharged

16 of these patients have been receiving treatment in ITU

An additional **3** daily inpatients awaiting results from COVID-19 testing

In total **420** inpatients have sadly died with a primary cause recorded as COVID-19

The ultimate “anchor” strap line

The community took great care of us...

Heathrow Local Recovery Plan

Heathrow Local Recovery Plan

Foreword

By The Rt. Hon. the Lord Blunkett

Like the whole of the airline and airport industry, Heathrow has faced unprecedented challenges since the outbreak of the COVID-19 virus. The pandemic has affected each and every one of us in different ways and will continue to have an effect long into the future.

It is individuals, families and whole communities that have felt the impact and not least for those whose livelihood has been based in and around Heathrow. Entire families have been affected where generations in the same household have worked on different aspects of the airport's services and supply chain.

The past few months have been difficult for us all. Many small to medium sized enterprises have closed their doors and many are worried about the future and whether they will have businesses to go back to. There has also been, self-evidently, a body blow to tourism, which plays an important part in the economic and social life of the area within easy travelling distance of Heathrow.

It is clear that the future of these local economies and communities is of paramount importance to Heathrow. Together with its local partners, the airport has had the urgent task of understanding the evolving direct impacts on these communities and how we can draw upon our unique positions in the local economy to best respond.

With every crisis comes an opportunity and it is vital we collaborate to input what is needed to support the recovery. I welcomed the opportunity to Chair a series of roundtable discussions with local stakeholders to discuss the issues facing the region and how we might address them. It is only through collaboration and by everyone working together, that we can hold on to what is feasible to save, and then start regenerating and building for the future.

I take some comfort from our collective effort which has resulted in an outline plan for creating a sustainable and inclusive recovery, supporting the future security of the economies and communities surrounding the airport.

The successful story that we should be able to tell in the future is one of a sub-region coming together, taking ownership and pulling out all the stops to meet the challenges faced during these unprecedented times. From education institutions to those representing business interests, from trade unions and local authorities, there has been a real willingness to take on the challenge. Together we can agree what can be achieved locally and decide which aspects will require continuing Government engagement and support.

The spirit and unity that I have seen in working closely with partners has already shown us that together, we can get through this. Our collaborative approach will help the airport to implement an agreed plan to create a sustainable and inclusive recovery, building a better and stronger future for our local communities.

David Blunkett

David Blunkett
The Rt. Hon. the Lord Blunkett
Chair of the Heathrow Local Recovery Forum

“The successful story that we should be able to tell in the future is one of a sub region coming together, taking ownership and pulling out all the stops to meet the challenges faced during these unprecedented times”
The Rt Hon, The Lord Blunkett

Supporting economic benefits across the UK

Heathrow has a large economic reach across the UK, thanks to its extensive supply chains

Covid-19: How Surrey stepped up

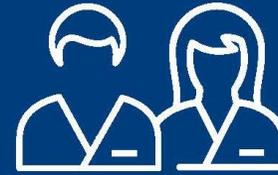

RAPID TESTING

Researchers from our Vet School and Centre for Vision, Speech and Signal Processing are working with partner universities to develop an easy-to-use Covid-19 test which can give results in under 30 minutes. The team have joined forces with three industrial partners to help bring the test to market.

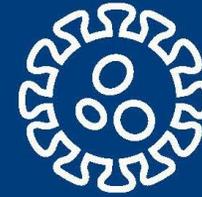

AIRBORNE TRANSMISSION

Our Global Centre for Clean Air Research is investigating ways to mitigate indoor airborne transmission of Covid-19.

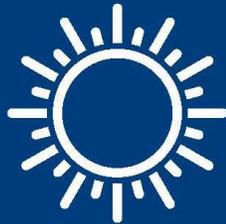

MENTAL HEALTH AND WELLBEING

Researchers from our School of Health Sciences have developed guidance to support the mental health of NHS nurses. And researchers from our School of Psychology are working with a local sixth form college to examine the impact of lockdown on the wellbeing of young people at home.

UNDERSTANDING COVID-19

Researchers from our Department of Chemistry are using mass spectrometry to better understand Covid-19 and help partners develop a vaccine.

VITAMIN D

Researchers from our Department of Nutritional Sciences are investigating whether there's a link between vitamin D and Covid-19.

VIRUS ADAPTATION

Researchers from our School of Bioscience and Medicine are working to understand how Covid-19 evades the antiviral response of human cells.

TREATMENT

Researchers from our Department of Biochemical Sciences are working with the Royal Free Hospital to monitor haematological markers in the blood of Covid-19 patients, to better inform treatment.

VACCINE

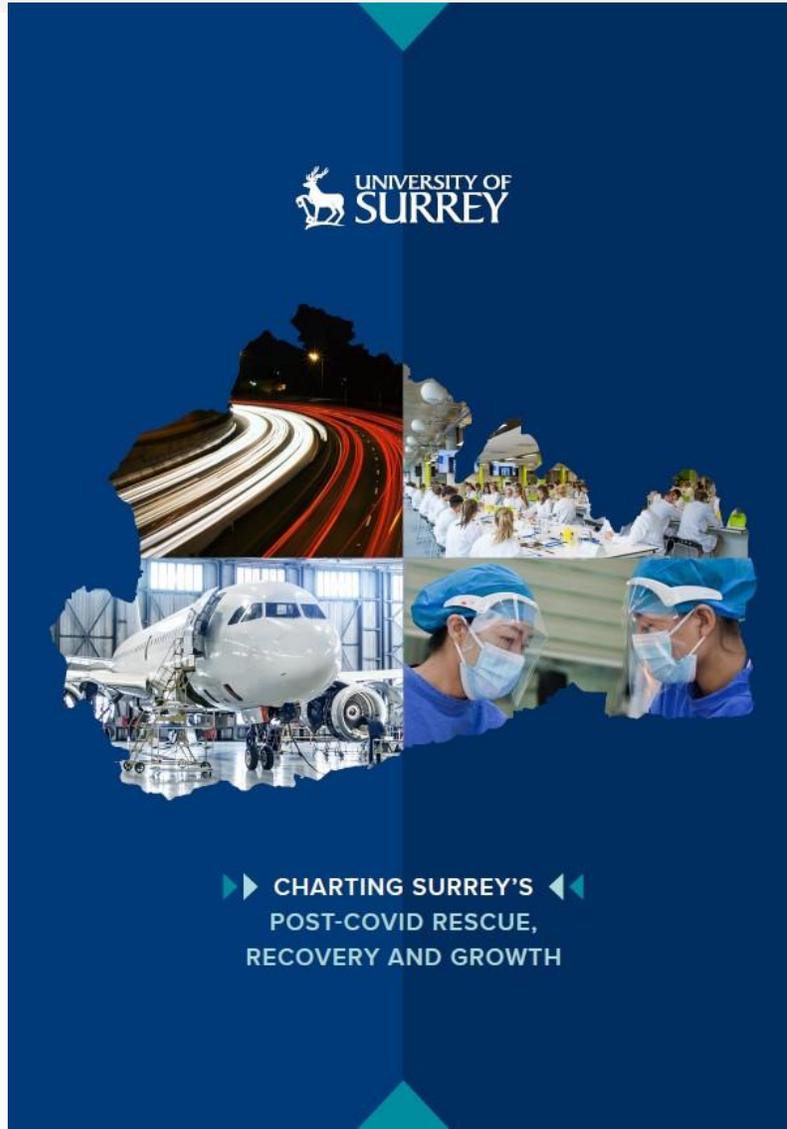

Surrey immunology researchers are examining biomarkers in blood that will help analyse vaccine responses in the future.

Just announced: *Virus Hunter*

International Trade Advisor

Department for
International Trade

Department for
International Trade

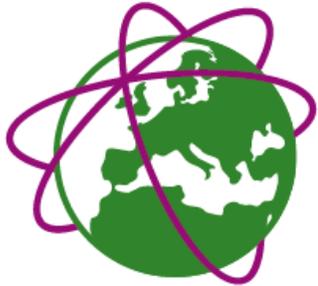

Introduction to DIT

**Helping businesses export and grow
into global markets.**

Who are DIT?

The Department for International Trade (DIT) are responsible for promoting British trade across the world, ensuring the UK takes advantage of the huge opportunities open to us.

Our DIT Services for Exporters:

- Understand how to do business overseas;
- Gain insight into global markets;
- Identify opportunities and open doors;
- Reach customers/partners not otherwise accessible;
- Raise their profile and credibility overseas;
- Understand the competition;
- Improve overseas marketing and communication;
- Access research to inform management decisions.

DIT's Global Presence

- DIT teams support businesses throughout the UK in identifying business opportunities around the world;
- DIT has more than 1,300 staff in over 100 overseas markets and around 400 people across 9 UK regions, working locally with UK businesses;
- Our 200+ expert International Trade advisers are recruited from the private sector, and have a wealth of experience in international trade and investment.

DIT has more than

1,300

staff in over

100

overseas markets

International Trade Advisers

Our 65+ expert London and South East International Trade Advisers (ITAs) offer free and impartial export advice and support to SMEs from all sectors based in these two regions.

ITAs help companies:

- Develop their export thinking
- Identify the right markets for their products or services
- Identify key export-related activities
- Set up meetings in key markets
- Generally help make business happen

Our Adviser network offers:

- Advisers with successful exporting track records
- Sector specialists
- Market/region specialists
- Activity specialists – marketing, joint ventures, agents and distributors etc.
- Language, experience and knowledge network
- Practical, realistic, useable resources

Sector Teams and Focus

Our London and South East International Trade Advisers are organised in 7 sector teams. All businesses receive support tailored to their sector and the countries they are interested in.

Sector Teams

- Consumer/Food and Drink
- Fashion and ecommerce
- Creative and Digital
- Professional Services
- Infrastructure and Energy
- Engineering and Manufacturing
- Technology

Key sector information:

- Sector specific content #1
- Sector specific content #2
- Sector specific content #3

The DIT Trade Services Portfolio

DIT offers a range of support to help UK eligible SMEs export and grow into global markets.

We offer:

- 1-2-1 Advice from expert trade advisers
- Tradeshow Access Programme (TAP) when Covid-19 travel restrictions allow
- Intensive Trade Support Programme (ITSP)
- International Trade Missions
- Access to export opportunities
- Overseas market research and information support

Virtual Events and Seminars:

- Meet the Buyer and Meet the Expert events
 - Virtual Trade Missions
 - Virtual Workshops and Master Classes including
 - Managing International Agents & Distributors
 - Winning and Delivering Business Internationally
 - Website Optimisation for International Trade
 - Pitching and Winning Business Online
 - Raising Trade Finance
 - Brand Innovation Strategies
- and more*

Useful Tools For Exporters

These online tools provide UK businesses with practical information about exporting/importing goods out of or into the UK. All tools are regularly updated to reflect any changes.

How to Export Goods (CHEG) online tool

- Businesses that export goods out of the UK should visit the **Check How to Export Goods** www.gov.uk/check-duties-customs-exporting online tool.
- This provides product-specific information about duties, Rules of Origin and customs procedures for over 160 markets around the world. It also provides information about the UK border.

Trade tariff tool: look-up commodity codes, duty and VAT rates

- Businesses that import goods into the UK can visit the **Trade tariff look-up** tool www.gov.uk/trade-tariff
- The tool provides information about tariffs, commodity codes, duties and VAT rates

Services

- For information on selling services into the EU go to: <https://www.gov.uk/guidance/providing-services-to-any-country-in-the-eu-iceland-liechtenstein-norway-or-switzerland-after-eu-exit>

Support to Sell Online

DIT can help you you export your products to consumers around the world through online marketplaces.

Tap into your knowledge

Get you free support from our UK-based E-Commerce Advisers. Their in-depth knowledge of exporting via e-commerce to international marketplaces means you will get tailored advice.

Get connected

Connect to international marketplaces through us and you'll enjoy the benefits. Our connections mean you might get reduced commission rates and 'try for free' periods.

Ongoing support

We will work with you on your e-commerce journey and support your business to grow by selling online overseas.

To find out more, visit <https://www.great.gov.uk/selling-online-overseas> or contact your local International Trade Adviser (ITA).

How the Department for International Trade helps

Trade finance for UK exporters

UK Export Finance (UKEF) is the UK's export credit agency. By putting the right finance and insurance in place, UKEF can help you win contracts, fulfil orders and get paid.

Win contracts

UKEF can help you win export contracts by providing attractive financing terms to your buyers.

Fulfil orders

UKEF supports working capital loans so you can take on and fulfil orders with confidence.

Get paid

UKEF makes sure you get paid by offering insurance against buyer default.

To find out more, visit <https://www.great.gov.uk/trade-finance> or contact your local International Trade Adviser (ITA).

The Intellectual Property Office (IPO) is the official UK government body responsible for intellectual property (IP) rights including patents, designs, trade marks and copyright.

IP Equip:

- E-learning tool / smartphone app designed to help you understand IP rights i.e. trade marks, patents, copyright and designs

IP Health Check:

- Free-to-use online tool. Please visit <https://www.ipo.gov.uk/iphealthcheck.htm>

IP Masterclasses:

- Training to help provide detailed knowledge on IP, or bite-sized videos. IPO trainings are available at: <https://www.gov.uk/government/news/intellectual-property-made-easy>

Events

- Held nationally to help IP holders protect their interests. To see the IPO event calendar visit: <https://www.gov.uk/government/publications/ipo-events-calendar/ipo-events-calendar>

EU Transition Resources

There are a number of online tools that UK SMEs can use to find information about the new rules on doing business with Europe that came into effect on 1 January 2021.

- **For UK businesses:** please initially go to [GOV.UK/transition](https://www.gov.uk/transition)
- **For EU businesses:** please initially go to [GOV.UK/eubusiness](https://www.gov.uk/eubusiness)
- If you can't find answers at [GOV.UK/transition](https://www.gov.uk/transition), fill out the **enquiry form** at www.great.gov.uk/transition-period/contact/ and one of our experts will try to help.
- Visit [great.gov.uk](https://www.great.gov.uk) for a range of online support including the latest export opportunities

Enquiries on EU Transition

You can email DIT's Enquiry Service at euexit@trade.gov.uk to support you to navigate and understand the changes introduced on 1 January 2021.

Support From Other Departments

- Visit www.gov.uk/guidance/help-and-support-if-your-business-trades-with-the-eu for the latest **webinars and videos**.
- **18 new video explainers** are available from BEIS to help you understand the actions your business needs to take. Visit www.workcast.com/?cpak=1070296099921910&pak=4264500033398249
- Visit www.gov.uk/guidance/help-and-support-for-uk-transition to sign up to or **watch online webinars and videos from HMRC**.
- Visit <https://youtu.be/BDkAEuzl6-I> for the recording of a recent online event by **Border and Protocol Delivery Group** covering Exporting from GB to EU via the short straights.
- Visit GOV.UK/guidance/webinars-for-exporters-of-animals-and-products-of-animal-origin-to-the-eu for webinars delivered by the **Department for the Environment, Food & Rural Affairs** for exporters of animals and products of animal origin to the EU
- To ask specific questions about your industry try the **Cross-border trade forum** <https://transition-forum.service.cabinetoffice.gov.uk/>
